

Prayer and Praise with Damaso

This is a prayer and praise report from our Peniel Seminary colleague Damaso Francisco. He is the Academic Dean, and also teaches at the Guayaquil seminary extension. This is the large port city on the Pacific coast. He teaches evangelism and missions and directs the outreach of the Department of Evangelism and Missions. He takes students out witnessing in Guayaquil and surrounding areas. He is from Bolivia and graduated with Alberto Copa from Hebron Theological Seminary in Santa Cruz. The student pictures are from the Guayaquil extension. Pictures on his third page are students doing outreach in the missions department on a trip to the jungle. – Wil

I am glad to share ministry news in Chimborazo Ecuador. We are now again teaching in classes in the Guayaquil extension with caution.

Many of the students were infected with Covid 19. We are grateful to God they all recovered and are back in class.

We are teaching them to grow from these experiences and to use them to reach out and minister to others.

We visited some churches of the students encouraging them to continue preparing, to stand firm in difficult times.

It is a time to reflect and keep learning, keep growing in the grace of God. Many times it takes moments like this to meditate and return to the Lord's original plan for his church.

Pray for the brothers who are going through difficult times. Many have lost their family members and loved ones. Many are returning to the churches and serving our Lord.

We are, little by little, resuming our plans for missionary trips and evangelism. At the beginning of this year we traveled to the jungle to work with some Shuar communities. Helping with some basic necessities. These are small churches, but they lack strong leaders in the Word. Their request is to help with medicines, if it is possible, to make a medical caravan in the coming months. God willing, we will be planning to fulfill their request. Abide in Christ provides funds for the Department of Evangelism and Missions teams.
